

When you're on the go morning till night, you'll feel better for Vent-Axia ventilation.

Running the house . . . coping with the children . . . you don't need us to tell you that life gets pretty hectic. Luckily, there's something to stop you getting all steamed up: Vent-Axia unit ventilation.

It keeps your kitchen or bathroom free of smells, steam and condensation.

A 6" or 7½" Vent-Axia is easily fitted in the window glass, will give years of trouble-free service and is simple to keep clean.

You control it through an ordinary switch, or a reversible control that gives extract or intake of air at three speeds, including boost.

Automatic or manual shutters prevent backdraught. The 6" Vent-Axia costs about £16, including purchase tax (about £25 with automatic shutter and reversible control).

Little enough for a reliable investment in better living.

The name is

Vent-Axia

Best value in unit ventilation. Ask the electrical trade.

Vent-Axia Limited, London, Manchester, Glasgow, Birmingham, Leeds, Newcastle upon Tyne, Bristol.
A Hall-Thermotank Group Company.
