

Clear the air with

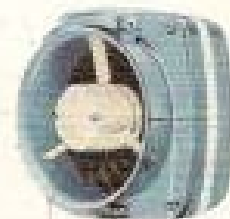

XPELAIR

Now in your kitchen **colour**

Good news! Now you can have the Xpelair in colour to match your kitchen. Yellow, green, red, blue, ivory-white or black plastic have been introduced for the popular 8-inch size. Gay! Contemporary!

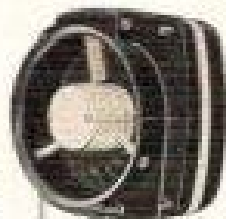

And what a blessing the Xpelair is! It extracts steam and cooking smells, cuts out condensation, prevents streaming wet walls.

Draughtproof, it has an in-built shutter which stops cold air blowing in when the fan is not running. Neat and unobtrusive, too, with its compact grille outlet. It is easily fixed in window glass or the wall.
