# dyson air multiplier

No blades. No buffeting. **NEW TECHNOLOGY**

**Blades cause buffeting.** The blades on conventional fans cause unpleasant buffeting because they chop the air before it hits you.

**No blades. No buffeting.** Air Multiplier™ technology amplifies surrounding air, giving an uninterrupted stream of smooth air.

## Argos Quick Guide to air purifiers

### Why buy an air purifier?

Air purifiers circulate the air in a room through a filter. The filter traps airborne particles such as dust and pollen which can cause allergic reactions such as asthma, hay fever attacks, excessive sneezing, itchy eyes and runny noses. An air purifier can alleviate such symptoms as they remove the particles which can trigger off such reactions.

### CADR (CLEAN AIR DELIVERY RATE) RATING

This is the measure of how quickly the air purifier can clean the air. The higher the CADR rating the quicker the air will be cleaned. Further information on CADR ratings can be found at [www.cadr.org](http://www.cadr.org)

### ROOM SIZE

This is the room size that the purifier is capable of cleaning. Make sure your purifier is adequate for the intended room.

### SPEED SETTINGS

The number of settings on the appliance, more settings will give you greater control.

### TECHNOLOGY

This is the filter technology that the purifier you choose uses. Filtrite™ filters use patented filter technology which allows more air to pass through the purifier than a HEPA air purifier with a comparable room size and CADR. HEPA filters remove 99.97% of all airborne particles, by passing the air through tightly woven (replaceable) glass fibre filters.

More information about air purifiers visit [www.argos.co.uk](http://www.argos.co.uk)
